

Evidence First. Humans Decide.

What should an agent be allowed to claim?

02

EVIDENCE
CONTRACTS
STATE
HUMAN AUTHORITY

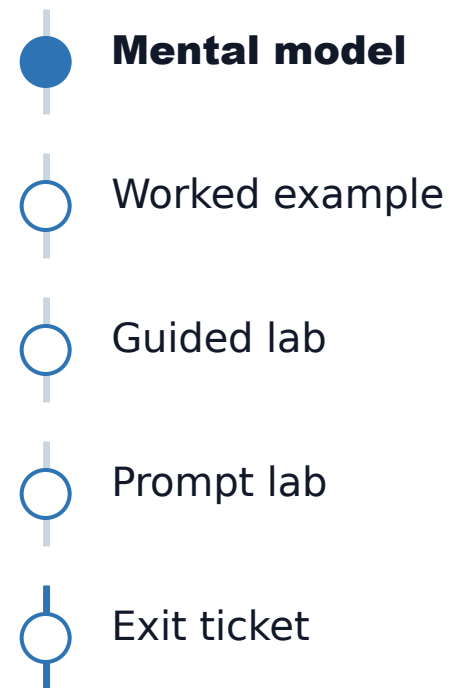

By the end, learners can do three observable things

01 **Separate evidence, assessment, recommendation, and decision**

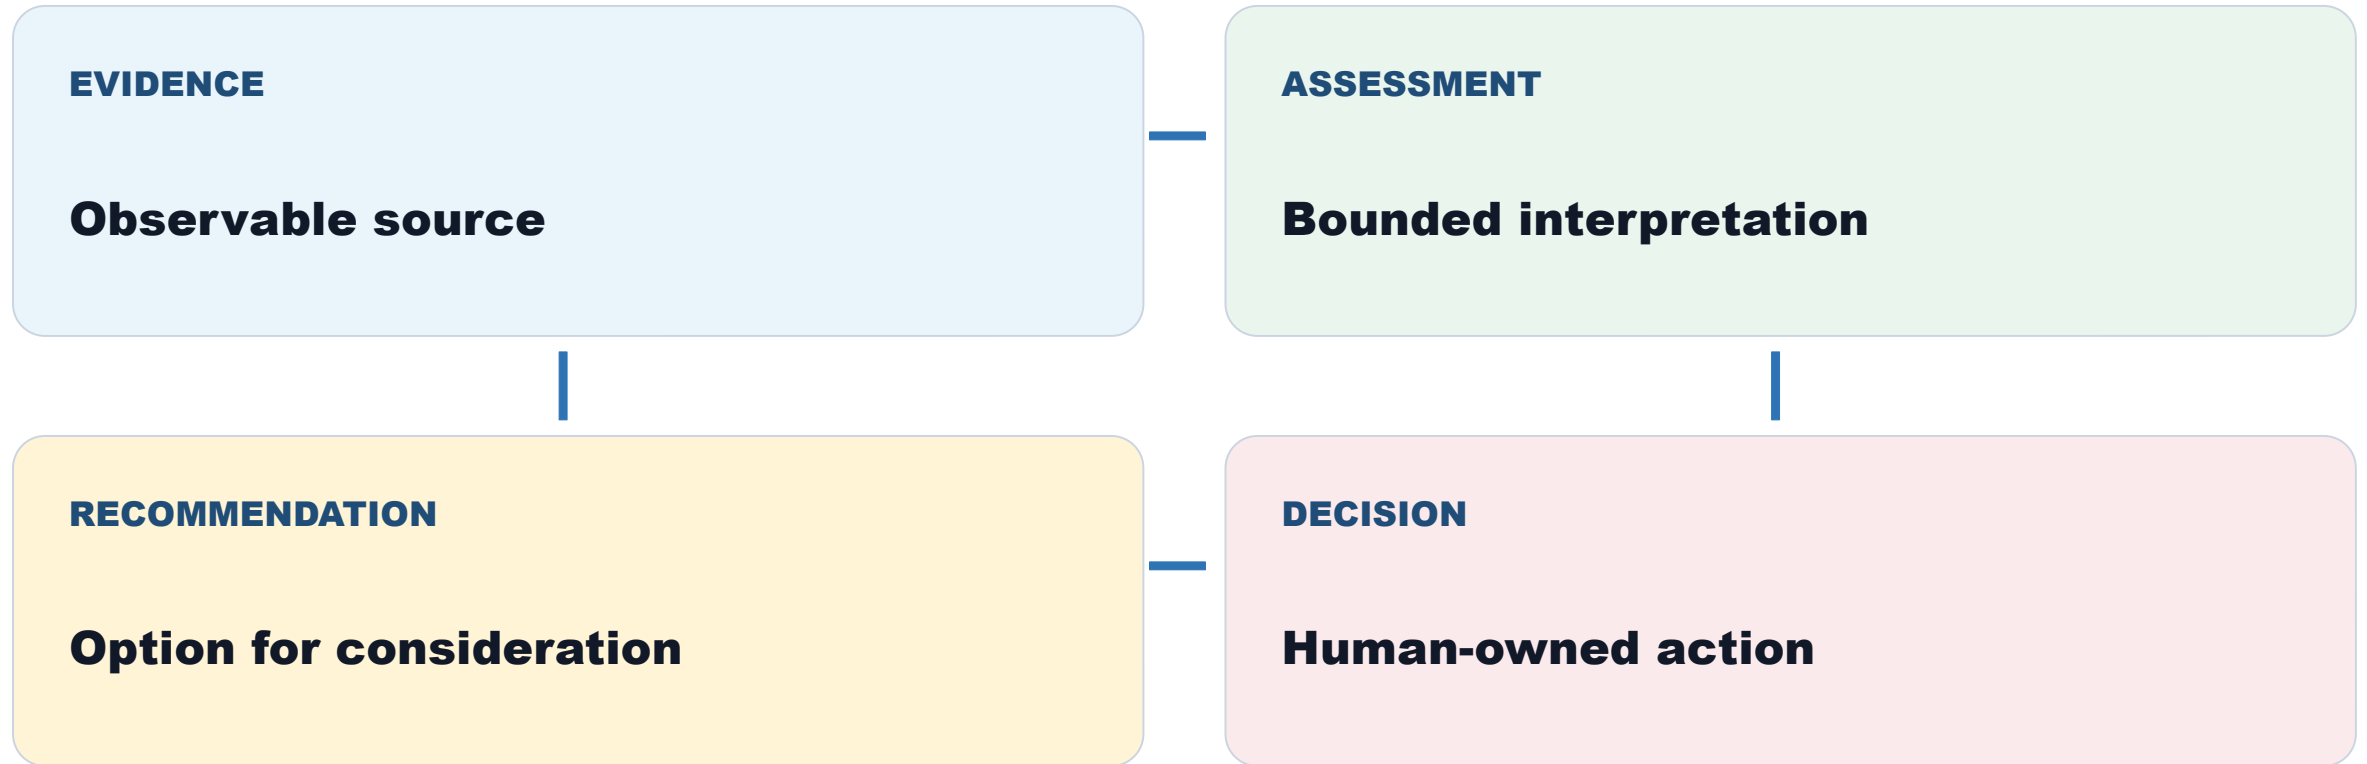

02 **Detect authority leakage**

03 **Rewrite claims with calibrated confidence**

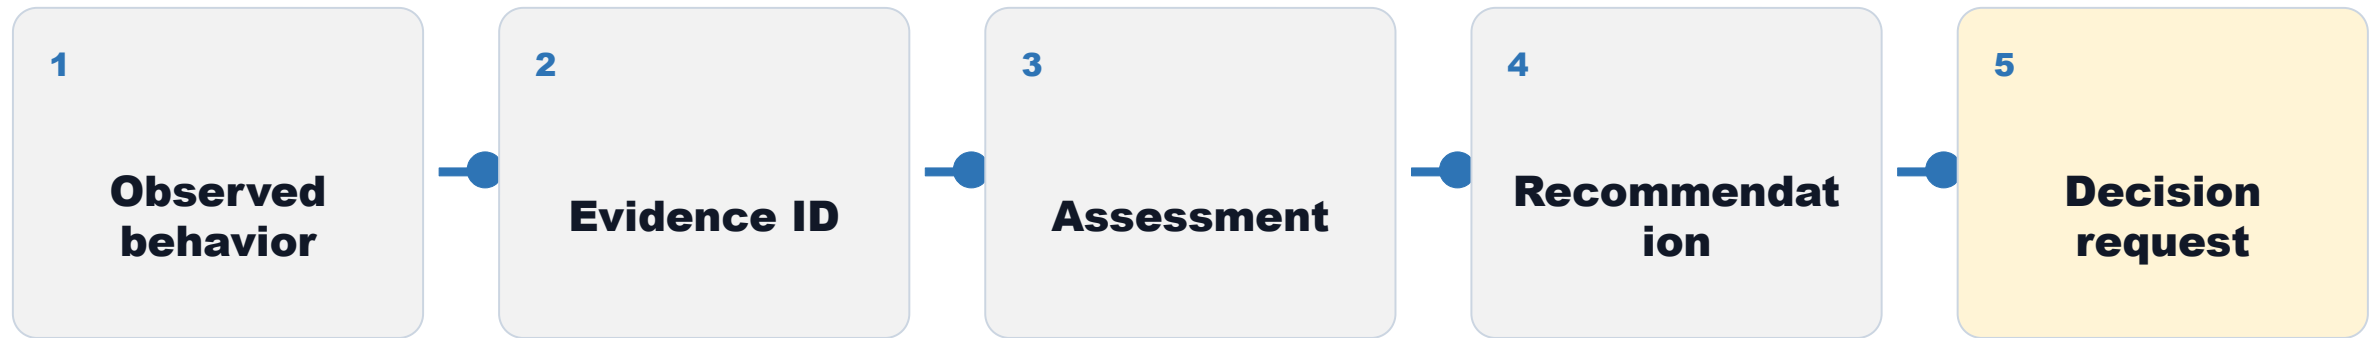

RUN OF SHOW

One system, four distinct ideas

A trustworthy result is a chain—not a clever paragraph

At every handoff: preserve identity, provenance, coverage, confidence, and consumer intent.

Build an artifact the room can inspect

TEAM TASK

Sort ten statements by epistemic type and repair the overclaims.

1

Classify

2

Cite evidence

3

Restore authority

Suggested timing: 5 min brief • 20 min work • 10 min critique • 5 min repair

Turn the contract into executable prompt behavior

Add authority language that prevents approval, waiver, or risk acceptance.

01

May observe

02

May assess

03

May recommend

04

Must request

05

Must not approve

06

**Must preserve
uncertainty**

Turn an overconfident conclusion into an evidence-linked decision request.

Answer with evidence. Name the contract, state, or authority boundary you used.
