

Evidence, Provenance, and Traceability

Can another engineer reproduce why this finding exists?

03

**EVIDENCE
CONTRACTS
STATE
HUMAN AUTHORITY**

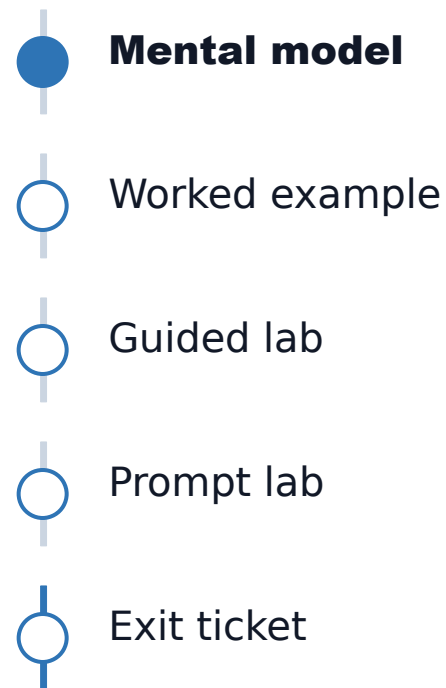

By the end, learners can do three observable things

01 **Build a complete evidence chain**

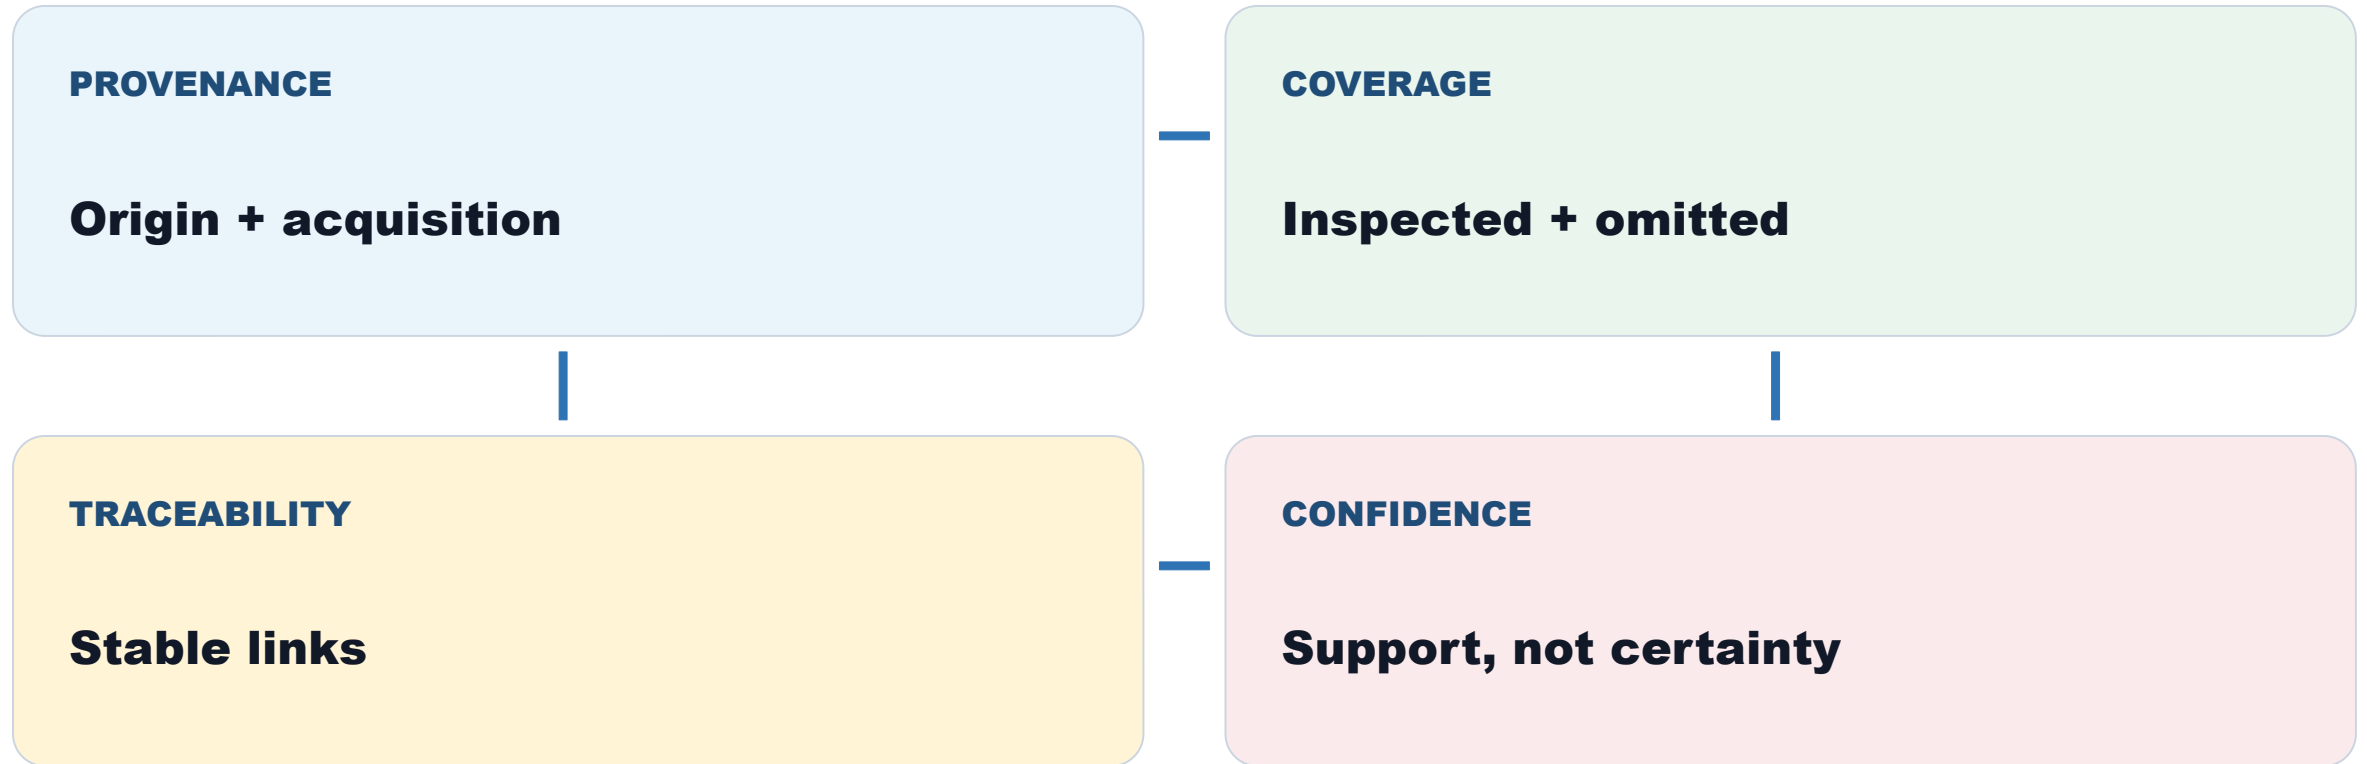

02 **Use provenance, coverage, and confidence correctly**

03 **Handle missing, stale, and conflicting evidence**

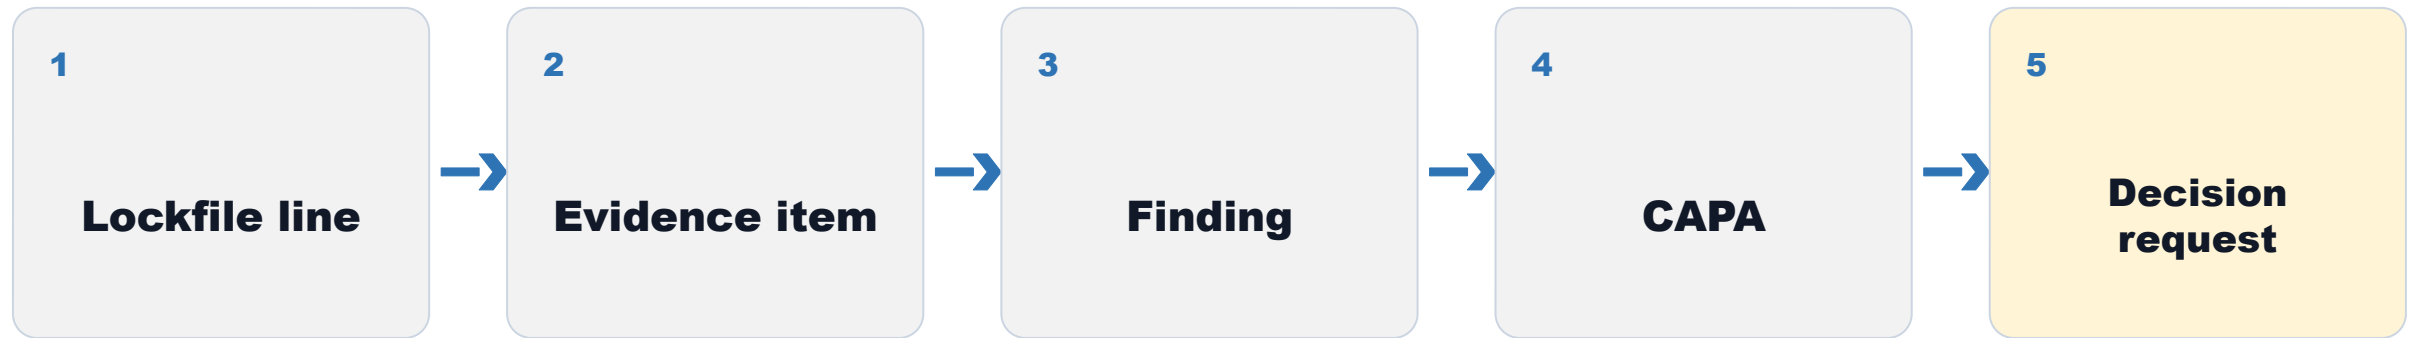

RUN OF SHOW

One system, four distinct ideas

A trustworthy result is a chain—not a clever paragraph

At every handoff: preserve identity, provenance, coverage, confidence, and consumer intent.

Build an artifact the room can inspect

TEAM TASK

Build and then deliberately break a finding's traceability chain.

1

Map identifiers

2

Remove one link

3

Explain the failure

Suggested timing: 5 min brief • 20 min work • 10 min critique • 5 min repair

Turn the contract into executable prompt behavior

Write evidence admission and citation rules that prevent unsupported findings.

01

Admissibility

02

Freshness

03

Evidence IDs

04

Coverage

05

Conflicts

06

Incomplete input

Show a reproducible chain and state its coverage limit.

Answer with evidence. Name the contract, state, or authority boundary you used.
