

How Contracts Work

How do independent agents exchange trustworthy artifacts?

04

**EVIDENCE
CONTRACTS
STATE
HUMAN AUTHORITY**

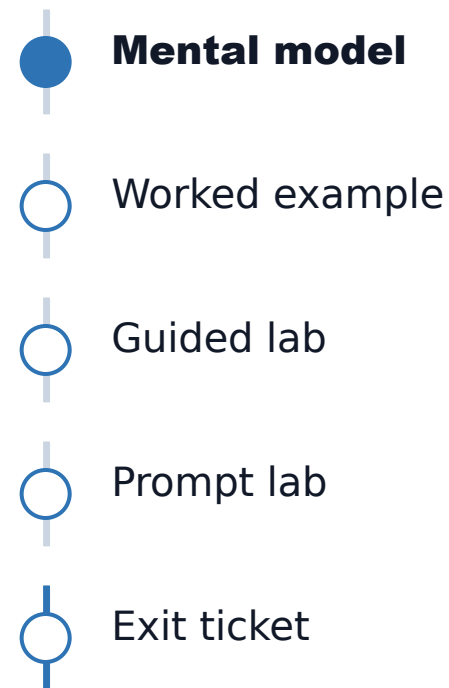

By the end, learners can do three observable things

01 Explain additive contract inheritance

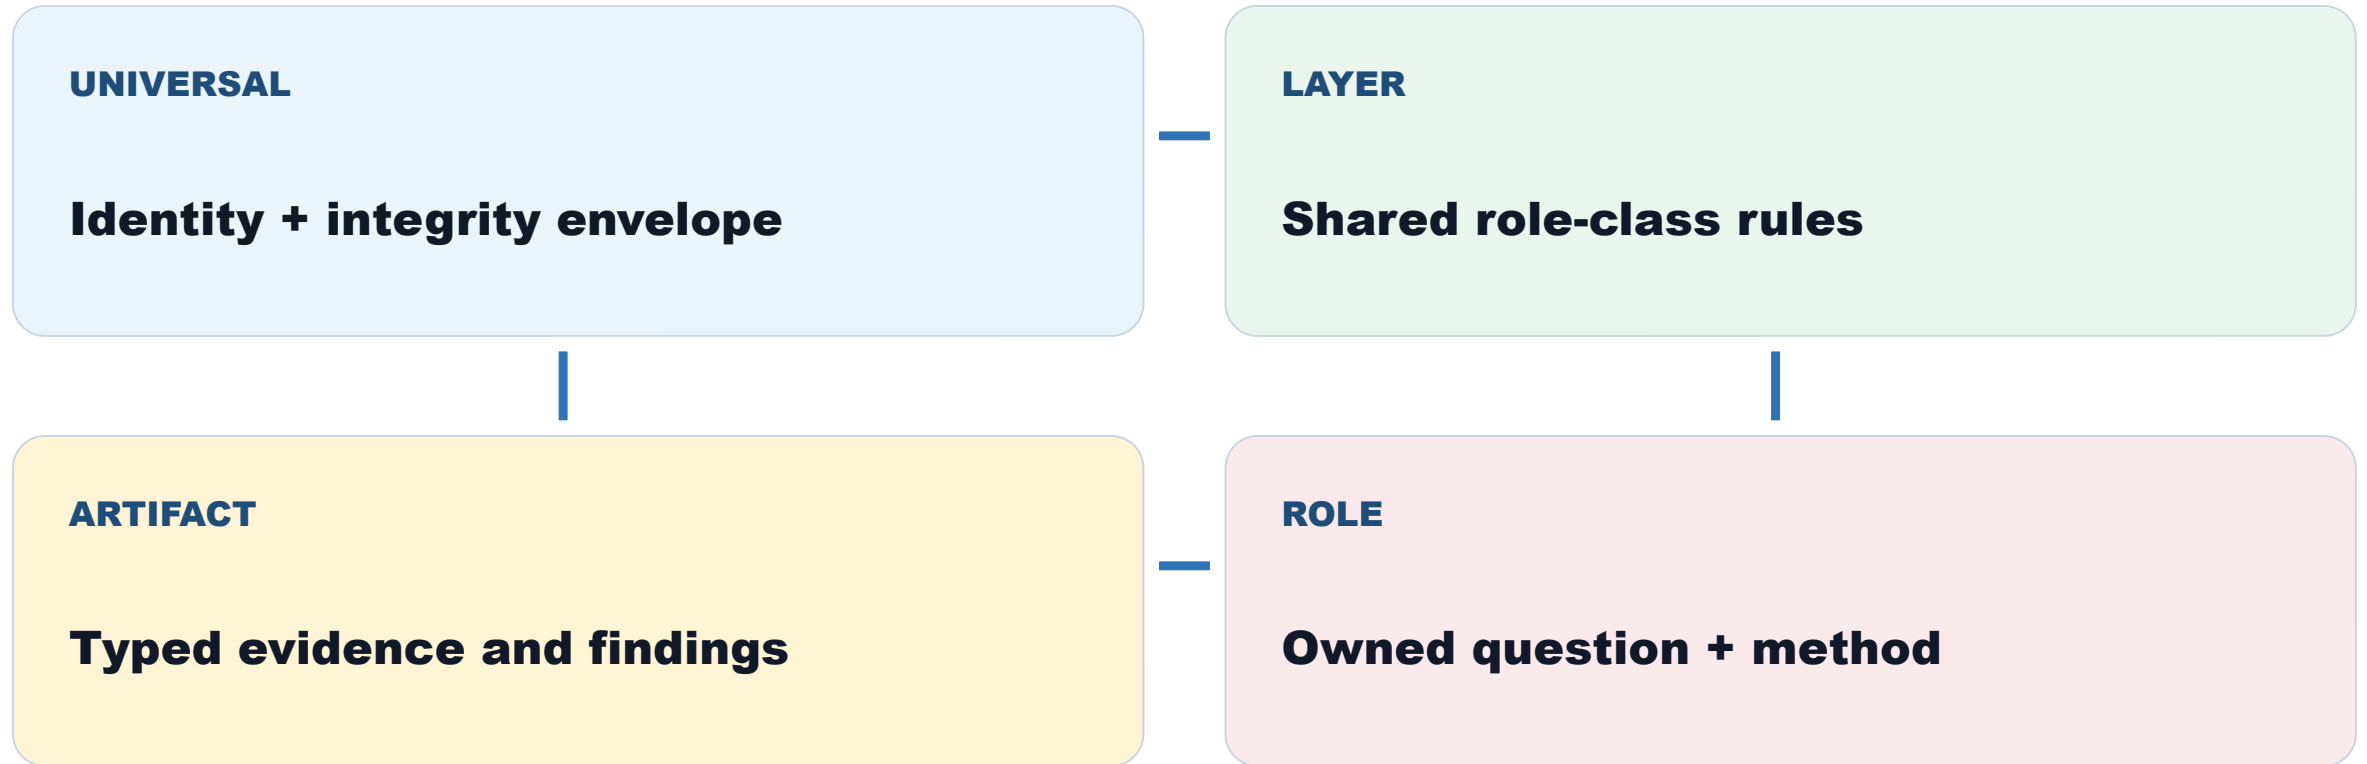

02 Map producers and consumers

03 Validate the universal envelope

RUN OF SHOW

One system, four distinct ideas

A trustworthy result is a chain—not a clever paragraph

At every handoff: preserve identity, provenance, coverage, confidence, and consumer intent.

Build an artifact the room can inspect

TEAM TASK

Repair a flawed artifact without changing its evidence.

1

Find missing fields

2

Find semantic violations

3

Validate the repair

Suggested timing: 5 min brief • 20 min work • 10 min critique • 5 min repair

Turn the contract into executable prompt behavior

Translate contract obligations into explicit prompt clauses and output fields.

01

Identity

02

Execution

03

Scope

04

Evidence

05

Confidence

06

Consumers

Explain why a role prompt cannot override the universal contract.

Answer with evidence. Name the contract, state, or authority boundary you used.
