

# The Prompt Implements the Contract

How do we turn a specification into reliable model behavior?

08

EVIDENCE  
CONTRACTS  
STATE  
HUMAN AUTHORITY

# By the end, learners can do three observable things

**01 Use the universal prompt structure**

**02 Trace every clause to a requirement**

**03 Keep method, output, and authority consistent**

## RUN OF SHOW

# One system, four distinct ideas

# A trustworthy result is a chain—not a clever paragraph

**At every handoff: preserve identity, provenance, coverage, confidence, and consumer intent.**

# Build an artifact the room can inspect

## TEAM TASK

**Convert a specialist role specification into a prompt and trace matrix.**

**1**

**Extract obligations**

**2**

**Draft clauses**

**3**

**Verify coverage**

**Suggested timing: 5 min brief • 20 min work • 10 min critique • 5 min repair**

# Turn the contract into executable prompt behavior

**Draft a complete first-pass prompt for a baseline specialist.**

01

**Identity**

02

**Authority**

03

**Inputs**

04

**Method**

05

**Output**

06

**Failure behavior**

**Defend each prompt section by citing its governing source.**
