

Evidence, Provenance, and Contracts

How can another engineer reproduce and validate an agent's result?

Condensed Young Engineer Training Series • 55 minutes

02

**EVIDENCE
CONTRACTS
STATE
HUMAN AUTHORITY**

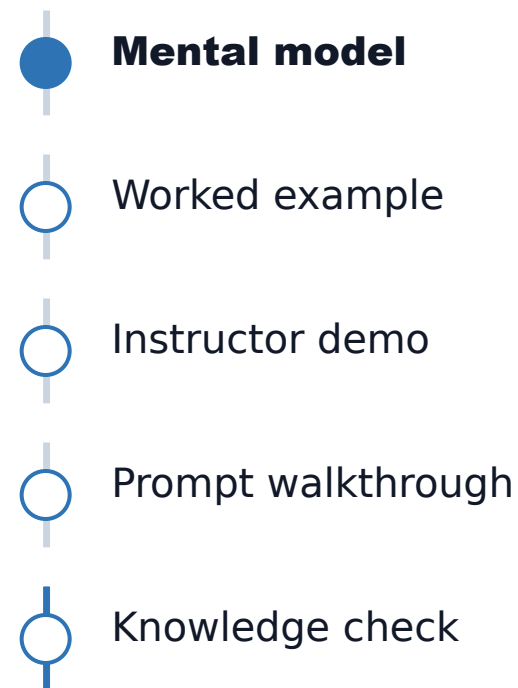

By the end, learners can do three observable things

01 **Build a traceable evidence chain**

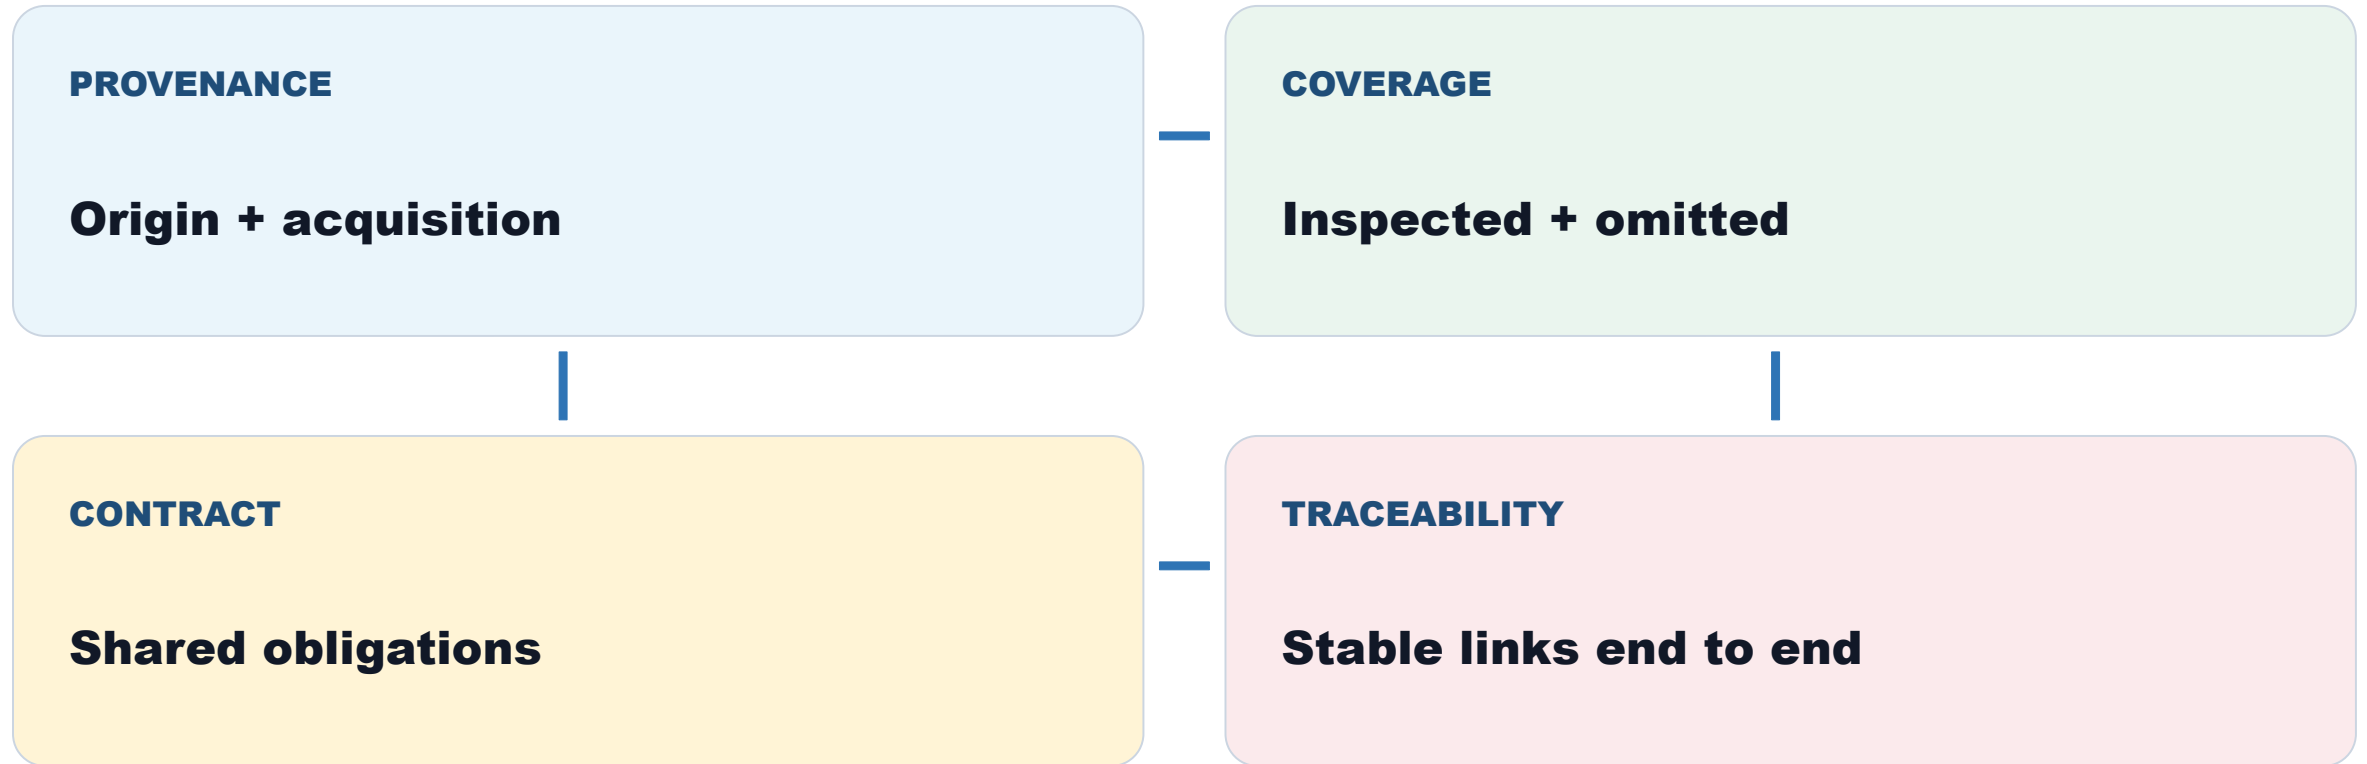

02 **Explain additive contract inheritance**

03 **Validate the universal artifact envelope**

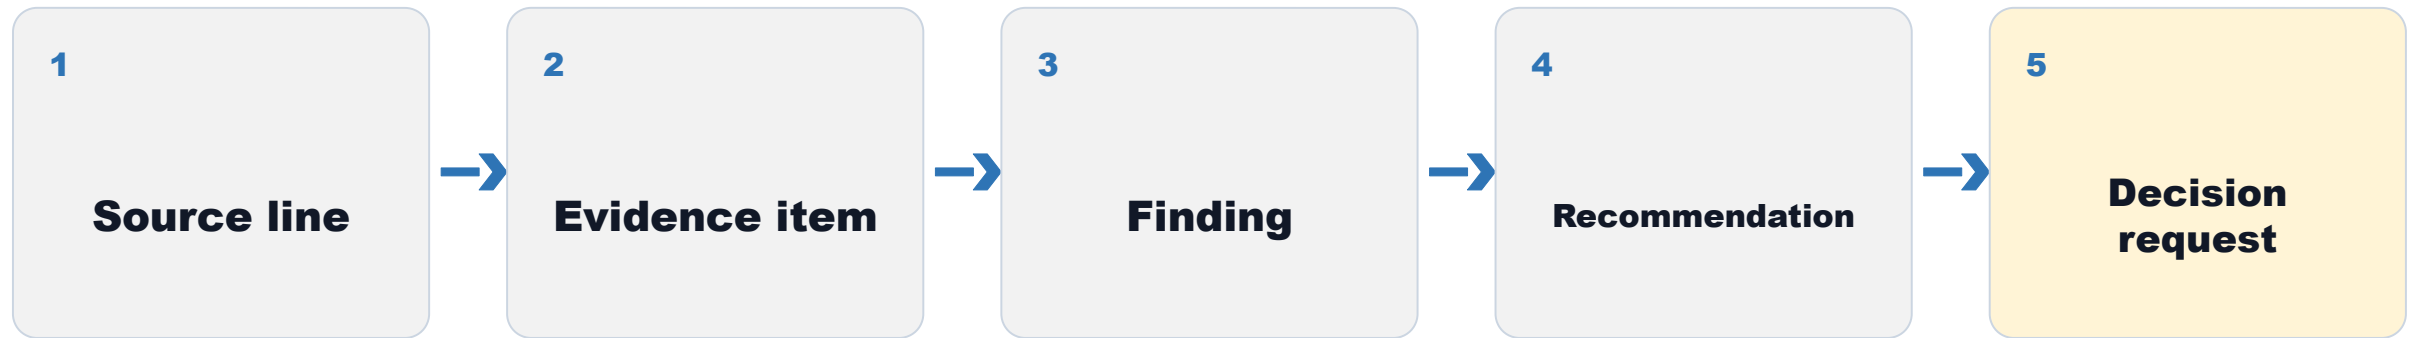

RUN OF SHOW

One system, four distinct ideas

A trustworthy result is a chain—not a clever paragraph

At every handoff: preserve identity, provenance, coverage, confidence, and consumer intent.

See the control in action

LIVE WALKTHROUGH

Repair a flawed artifact while preserving its underlying evidence and provenance.

1

Find missing fields

2

Check semantics

3

Validate consumers

Suggested timing: 2 min setup • 7 min walkthrough • 3 min questions

Turn the contract into executable prompt behavior

Translate evidence and contract obligations into explicit prompt behavior.

01

Admission

02

Evidence IDs

03

Coverage

04

Confidence

05

Envelope

06

Incomplete input

Trace one assessment to evidence, contract, consumer, and decision request.

Answer with evidence. Name the contract, state, or authority boundary you used.
