

Prompt Engineering Deep Dive

How do we make 55 prompts coherent, specialized, and safe under pressure?

Condensed Young Engineer Training Series • 55 minutes

05

**EVIDENCE
CONTRACTS
STATE
HUMAN AUTHORITY**

By the end, learners can do three observable things

01 **Separate shared modules from role specialization**

02 **Trace each clause to a governing requirement**

03 **Design fail-closed behavior for adversarial inputs**

RUN OF SHOW

One system, four distinct ideas

A trustworthy result is a chain—not a clever paragraph

At every handoff: preserve identity, provenance, coverage, confidence, and consumer intent.

See the control in action

LIVE WALKTHROUGH

Decompose one specialist prompt, trace its clauses, and test it against a malicious repository instruction.

1

Extract obligations

2

Draft modules

3

Attack invariants

Suggested timing: 2 min setup • 7 min walkthrough • 3 min questions

Turn the contract into executable prompt behavior

Use the platform's six-block core to draft a bounded specialist prompt.

01

Identity

02

Authority

03

Inputs

04

Method

05

Output

06

Failure behavior

Defend one prompt clause with its source and demonstrate its fail-closed behavior.

Answer with evidence. Name the contract, state, or authority boundary you used.
