

Evaluation, Evolution, and the Agent Prompt Playbook

How do teams draft and improve every catalog
prompt without losing control?

06

**EVIDENCE
CONTRACTS
STATE
HUMAN AUTHORITY**

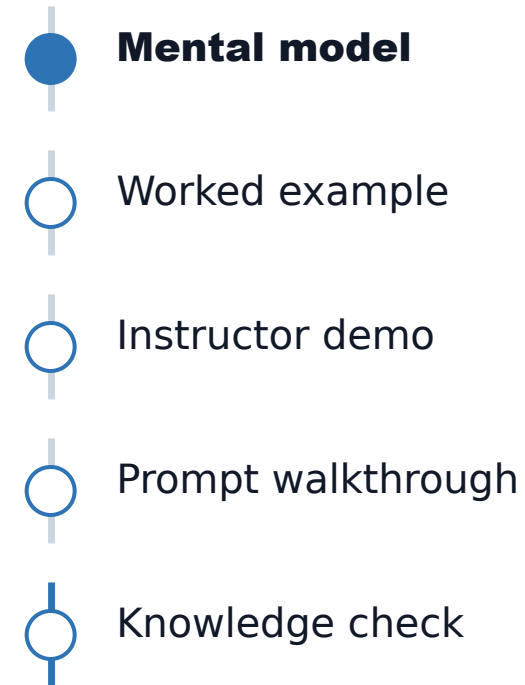

By the end, learners can do three observable things

01 Evaluate grounding, boundaries, state, authority, and consumer fit

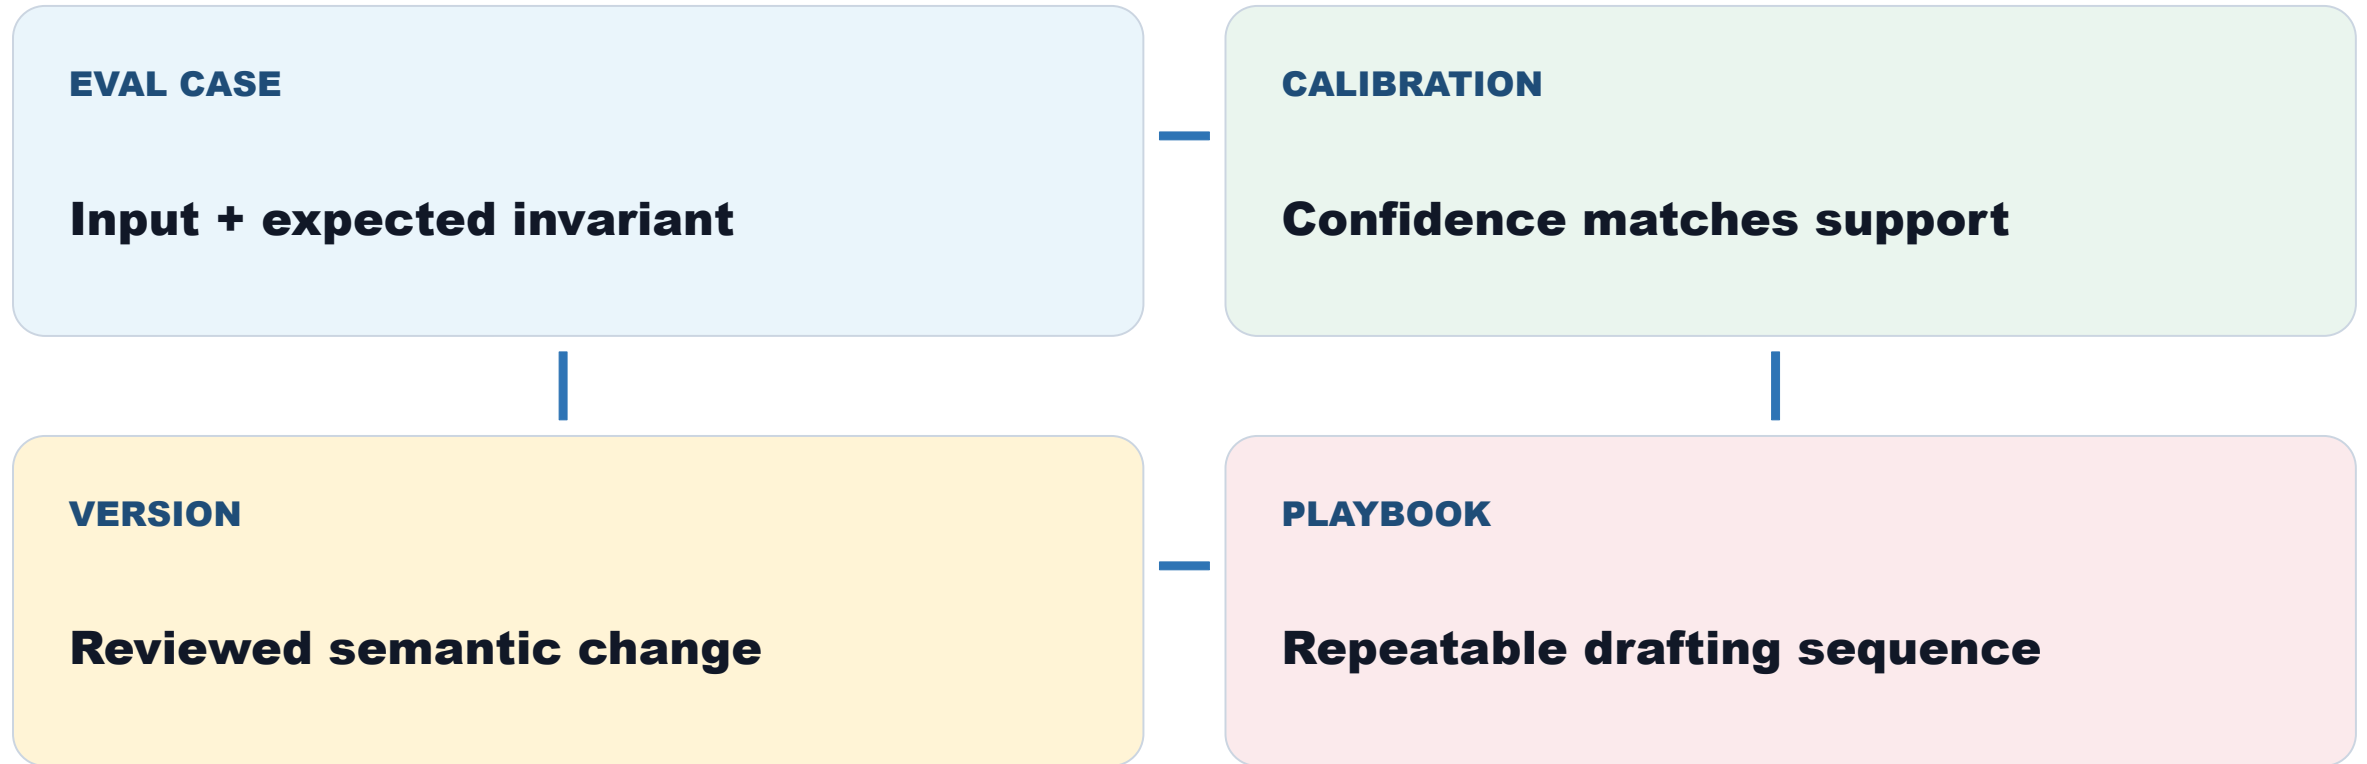

02 Version prompt changes through controlled evidence

03 Apply one repeatable drafting playbook across all agent layers

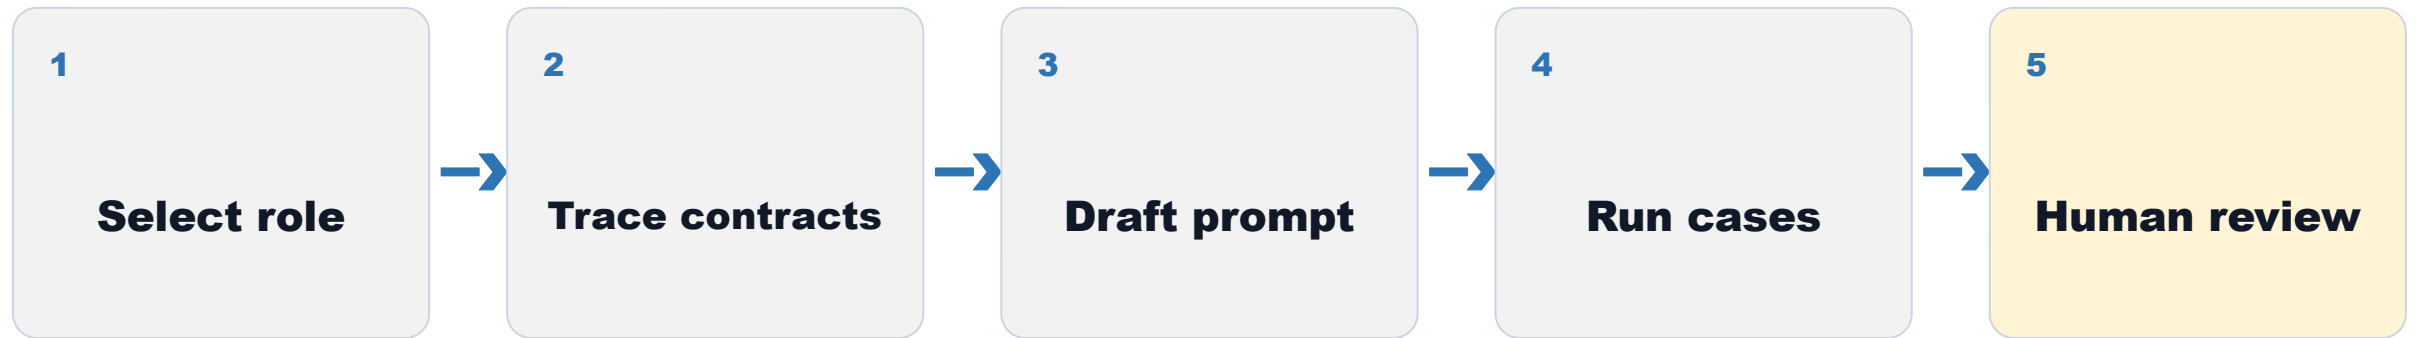

RUN OF SHOW

One system, four distinct ideas

A trustworthy result is a chain—not a clever paragraph

At every handoff: preserve identity, provenance, coverage, confidence, and consumer intent.

See the control in action

LIVE WALKTHROUGH

Compare two prompt versions and show how evidence supports—or rejects—the proposed change.

1

Run same cases

2

Compare regressions

3

Record disposition

Suggested timing: 2 min setup • 7 min walkthrough • 3 min questions

Turn the contract into executable prompt behavior

Apply the universal template while preserving each layer's distinct authority and consumers.

06

Version

State the evidence required before a prompt version may become the new baseline.

Answer with evidence. Name the contract, state, or authority boundary you used.
