

Evaluation, Calibration, and Prompt Evolution

How do we know a prompt is improving rather than merely changing?

11

**EVIDENCE
CONTRACTS
STATE
HUMAN AUTHORITY**

By the end, learners can do three observable things

01 **Build a contract-derived rubric**

02 **Measure calibration and boundary adherence**

03 **Evolve prompts through controlled change**

RUN OF SHOW

One system, four distinct ideas

A trustworthy result is a chain—not a clever paragraph

At every handoff: preserve identity, provenance, coverage, confidence, and consumer intent.

Build an artifact the room can inspect

TEAM TASK

Score two prompt versions against the same corpus and explain every regression.

1

Run cases

2

Compare evidence

3

Recommend disposition

Suggested timing: 5 min brief • 20 min work • 10 min critique • 5 min repair

Turn the contract into executable prompt behavior

Create a ten-case suite with negative and conflict cases.

01

Grounding

02

Completeness

03

Boundaries

04

Authority

05

State

06

Consumer fit

Recommend a version change and tie it to semantic impact.

Answer with evidence. Name the contract, state, or authority boundary you used.
