

Prompt Decomposition and Specialization

How do we keep 55 prompts coherent without making them identical?

09

EVIDENCE
CONTRACTS
STATE
HUMAN AUTHORITY

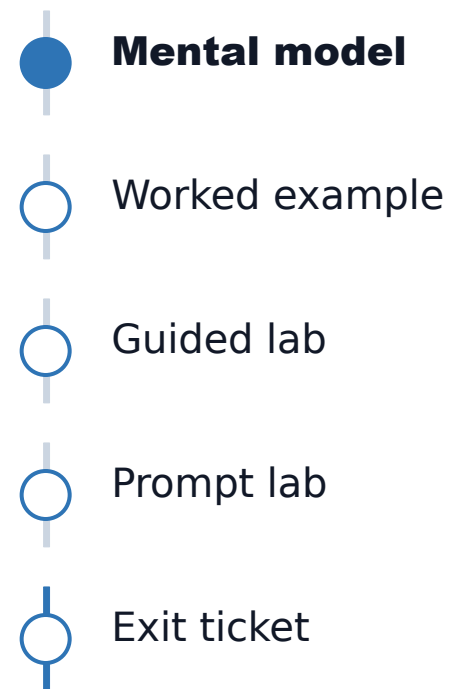

By the end, learners can do three observable things

01 **Separate shared modules from specialization**

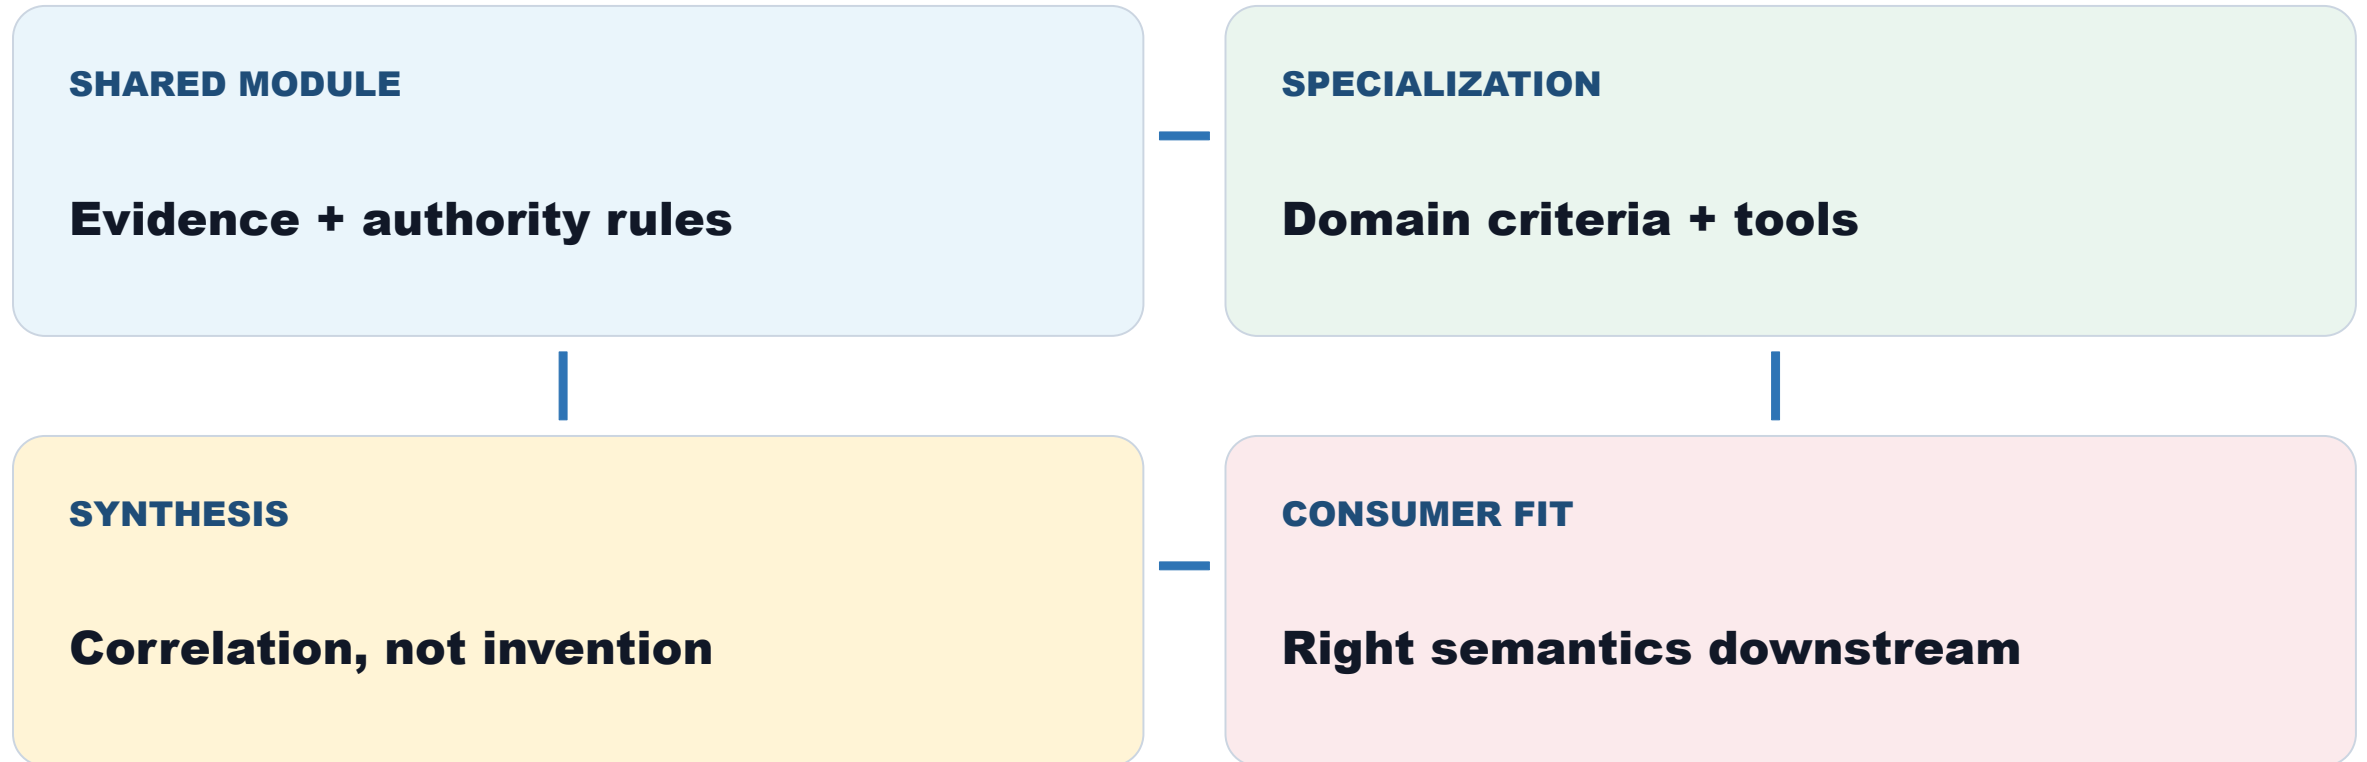

02 **Define exclusions and consumers**

03 **Preserve disagreement during synthesis**

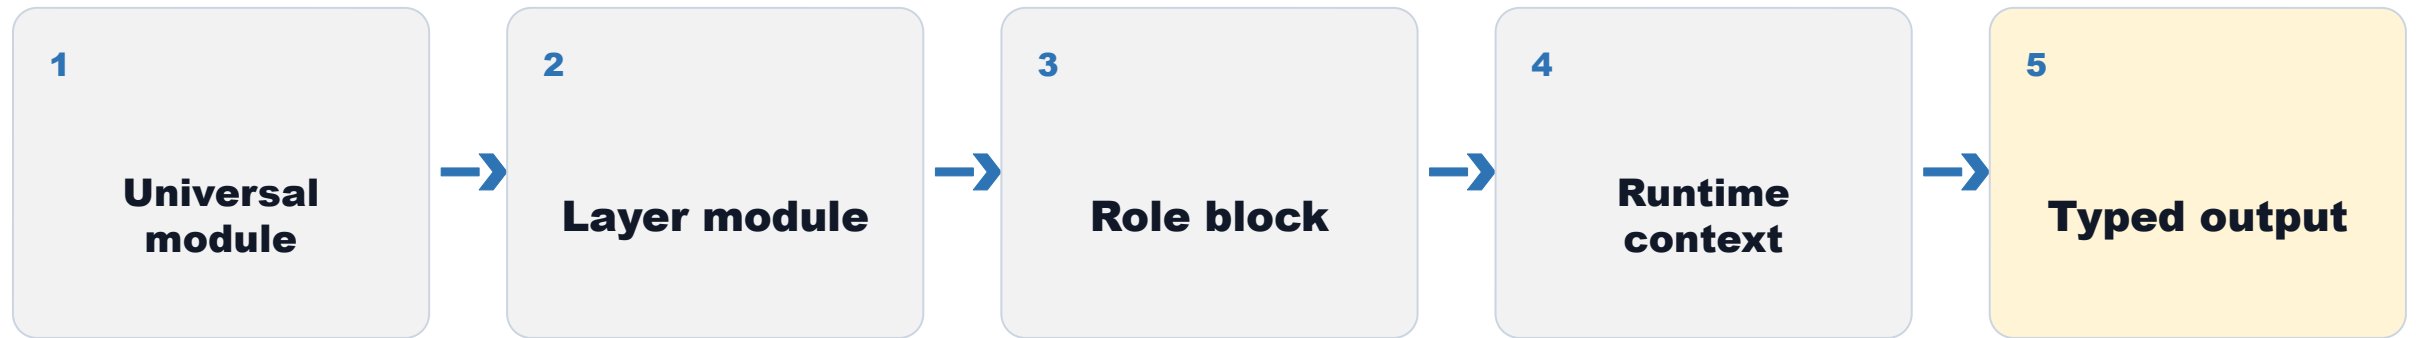

RUN OF SHOW

One system, four distinct ideas

A trustworthy result is a chain—not a clever paragraph

At every handoff: preserve identity, provenance, coverage, confidence, and consumer intent.

Build an artifact the room can inspect

TEAM TASK

Draft one prompt per layer, then extract the genuinely reusable clauses.

1

Compare drafts

2

Extract modules

3

Retest boundaries

Suggested timing: 5 min brief • 20 min work • 10 min critique • 5 min repair

Turn the contract into executable prompt behavior

Write a synthesis clause that preserves source IDs and conflicts.

01

Source IDs

02

Coverage

03

Disagreement

04

No overrule

05

Confidence

06

Decision request

Move one duplicated policy clause into a shared module without erasing role boundaries.

Answer with evidence. Name the contract, state, or authority boundary you used.
